IA WEALTH BALANCED PORTFOLIO - SERIES B5, E5, L5 AND T5 UNITS

**How risky is it?**

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

IA Clarington Investments Inc. has rated the volatility of this fund as **low to medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

Low	<b>Low to medium</b>	Medium	Medium to high	High
-----	----------------------	--------	----------------	------

For more information about the risk rating and specific risks that can affect the fund's returns, see the section "What are the Risks of Investing in this Fund?" of the fund's simplified prospectus.

**No guarantees**

Like most mutual funds this fund doesn't have any guarantees. You may not get back the amount of money you invest.

**How has the fund performed?**

This section tells you how Series T5 units of the fund have performed over the past seven years. Returns are after expenses have been deducted. These expenses reduce the fund's returns. The performance of Series B5, E5 and L5 units would be similar to the performance of Series T5 but would vary as a result of the difference in the combined management and administration fees compared to Series T5 units as disclosed in the fee decrease table under "Fund Expenses" below.

**Year-by-year returns**

This chart shows how Series T5 units of the fund performed in each of the past seven calendar years. The fund dropped in value in two of the seven years.

The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for Series T5 units of the fund in a 3-month period over the past seven years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
<b>Best return</b>	9.38%	June 30, 2020	Your investment would rise to \$1,094
<b>Worst return</b>	-10.54%	March 31, 2020	Your investment would drop to \$895

**Average return**

A person who invested \$1,000 in Series T5 units of the fund since its inception holds today \$1,276, which represents an annual compounded rate of return of 3.08%.

**Who is this fund for?**

**Investors who:**

- Seek the possibility of capital appreciation and income\*;
- Have low to medium risk tolerance;
- Plan to invest over the medium to long term.

\*Distributions on this series are expected to include a return of capital, which can erode the value of your investment.

**A word about tax**

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

**How much does it cost?**

The following tables show the fees and expenses you could pay to buy, own and sell Series B5, E5, L5 and T5 units of the fund. The fees and expenses, including any commissions, can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

As part of the Program, we may automatically switch your investment in Series B5, L5 and T5 into Series E5 when your aggregate eligible investment in IA Clarington Funds reaches \$100,000, if at that time, Series E5 has a lower management fee. Upon expiry of the redemption fee schedule, your investment will be switched to another series, under the Front End Option, at the same or lower fee.

If your aggregate eligible investment no longer meets the eligibility threshold, we may switch your investment back into another series, which may have a higher management fee. See the fee decrease table under "Fund Expenses" below.

Please see **Switching Between Mutual Fund Series** under the heading "Purchases, Switches and Redemptions" and "Fees and Expenses" of the Simplified Prospectus and speak to your representative for additional details.

Series L5 and T5 are not available to purchases under the Deferred Sales Charge, Low Load and Advisor Service Charge Options and are only available by switching from securities of another IA Clarington Fund under the same sales charge option. For information about the redemption fees payable when you redeem units purchased under the Deferred Sales Charge, Low Load and Advisor Service Charge Options, please see **Redemption Fees** under the heading "Fees and Expenses" of the Simplified Prospectus and speak to your representative for additional details.

**2. Fund expenses**

You don't pay these expenses directly. They affect you because they reduce the fund's returns. Series B5, L5 and T5 have higher combined management and administration fees than Series E5.

	Annual rate (as a % of the fund's value)			
	Series B5	Series E5	Series L5	Series T5

<b>Fund expenses</b>	<b>2.21%</b>	<b>2.15%</b>	<b>2.57%</b>	<b>2.53%</b>
<b>For every \$1,000 invested, this equals:</b>	<b>\$22.10</b>	<b>\$21.50</b>	<b>\$25.70</b>	<b>\$25.30</b>

The table below sets out the combined management and administration fee decrease after automatic switch.

**More about the trailing commission**

The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and advice that your representative and their firm provide to you. IA Clarington Investments Inc. pays the trailing commission to your representative's firm. It is paid from the fund's management fee and is based on the value of your investment.

Series T5 units are not available under the Front End Option. We no longer pay trailing commissions to discount brokers.

Upon the automatic switch of your investment, your representative may receive a higher trailing commission of up to 1.00% of your investment each year.
