What does the Fund invest in?

The Fund's objective is to provide income and long-term capital appreciation by primarily investing, either directly or indirectly through investments in other mutual funds and exchange-traded funds (ETFs), equity securities of companies located anywhere in the world that pay (or may be expected to pay) dividends, as well as other types of securities that may be expected to distribute income.

Key Reasons to Invest

- Designed to provide investors with enhanced income potential by allocating to both low-cost, passive ETFs and actively managed mutual funds.
- Active asset allocation managed by an experienced team that employs an integrated, multifaceted and disciplined institutional investment approach.
- Diversified by investment style, sector and market capitalization.

Commissions, trailing commissions, management fees, brokerage fees and expenses all may be associated with mutual fund investments, including investments in exchange-traded series of mutual funds. Please read the prospectus before investing. Rates of return include changes in share or unit value and reinvestment of all dividends or distributions but do not account for sales, redemption, distribution, optional charges, or income taxes payable by any securityholder that would have reduced returns. Returns for more than one year are historical annual compounded total returns while returns for one year or less are cumulative figures and are not annualized. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The compound growth chart only illustrates the effects of a compound growth rate and is not intended to reflect future Fund values or returns. Performance data of different fund series may differ due to different fee structures and other reasons. When a material merger occurred, performance is measured from the merger date (Performance Start Date or PSD). Distribution payments are not guaranteed and may fluctuate. Distributions paid should not be confused with a Fund's performance, rate of return or yield. If distributions paid exceed Fund performance, your original investment will shrink. Distributions paid resulting from capital gains realized by a Fund and income and dividends earned by a Fund are taxable to you in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero. A Fund's "yield" refers to income generated by its portfolio holdings, not return or the income paid out by the Fund. "Portfolio Yield" refers to the Fund's overall yield, not of each Fund series. Refer to the prospectus for details on each Fund series. U.S. dollar securities may not be held in Registered Plans, except TFSA's. ⁵The Estimated MERs are based on the management and fixed administration fees in effect as of June 2, 2025 and include Independent Review Committee (IRC) and Director fees, where applicable. They also reflect a proportionate share of the MERs of underlying mutual funds and ETFs based on the Fund's asset mix as of June 2, 2025, and a blended HST rate of 10.5%. Please note that both the Fund's asset mix and the applicable HST rate may change over time. As a result, the actual MER may differ from the estimate provided. The final MER for the semi-annual period ending September 30, 2025, will be published once available.
