Management Discussion of Fund Performance

The management discussion of fund performance for IA Clarington Loomis Global Multisector Bond Fund (the "Fund") represents management's view of the significant factors and developments affecting the Fund's performance and outlook for the period since its inception to March 31, 2021. IA Clarington Investments Inc. is the manager (the "Manager") of the Fund.

Investment Objective and Strategies

The Fund's objective is to provide income with the potential for long-term capital growth by primarily investing in fixed income securities located anywhere in the world.

The Fund's strategy is to invest primarily in fixed income securities of corporations, governments and other issuers, such as supranational issuers, from around the world.

The Fund's Portfolio Manager is Industrial Alliance Investment Management Inc. ("IAIM" or the "Portfolio Manager") and its Sub-Advisor is Loomis, Sayles & Company L.P. ("Loomis Sayles" or the "Portfolio Sub-Advisor" or the "fund manager").

Risk

The overall risk of investing in the Fund remains as described in the prospectus.

The Fund is suitable for investors seeking income and preservation of capital, with low risk tolerance and planning to invest over the medium to long term.

Results of Operations

The Fund's Net Assets were \$287.4 million on March 31, 2021 due to net sales.

The average Net Asset Value of the Fund was \$169.3 million. Average Net Asset Value influence revenue earned and expenses incurred by the Fund during the period.

Series A shares of the Fund have returned 0.6% since its inception in July 2020. The performance of the other series of the Fund is substantially similar, save for differences in fees and expense structure. Refer to the "Past Performance" section for performance information of each series.

The Fund's benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index (CAD Hedged), returned -3.1% for the same period. The Fund's return calculation for all series includes fees and expenses, which are not applicable in generating a return for the benchmark.

After a strong recovery following the market collapse in the spring of 2020, the bond market stumbled through the first quarter of 2021. Although there were some setbacks with rising COVID-19 cases in Europe and parts of Latin America, the vaccine rollout fostered confidence that normal economic activity would begin to resume in 2021. In the U.S., estimates for growth in gross domestic product continued to climb amid improvements in consumer sentiment, retail sales and shipping volumes.

These developments, together with rising commodity prices, fueled concerns about the possibility of higher inflation and raised concerns that the U.S. Federal Reserve (the Fed) would need to tighten interest-rate policy sooner than expected. Fed Chairman Jerome Powell responded in March by reassuring investors that the central bank intended to pursue its ultra-accommodative approach for several more years, even if inflation began to run above its 2% target. Powell also stated that the recent uptick in inflation was likely to be a "transitory" phenomenon. Nevertheless, the markets remained on edge about the threat of inflation owing to supply-chain disruptions and mounting cost pressures.

Security selection, particularly within investment-grade and high-yield corporate credit, contributed to the relative performance of the Fund. Investment-grade bonds, aided by consumer cyclicals, transportation and capital goods holdings, also contributed to performance.

At the sector level, an underweight position in U.S. Treasuries contributed to performance, as these did not keep pace with corporate credit during the period.

Within high-yield credit, selected energy, banking and finance company exposure contributed to the Fund's relative performance.

At the individual contributor level, General Motors Company (5.95%, 01/04/2049), The Boeing Co. (3.75%, 01/02/2050) and Expedia Inc. (3.25%, 25/02/2030) all contributed to the Fund's performance. These issues were purchased at significant discounts as they were pressured by the pandemic shutdowns earlier in the year.

An allocation to cash and cash equivalents detracted from the relative performance of the Fund as markets recovered and investors generally favoured riskier asset classes.

AT&T Inc. (3.65%, 01/06/2051) detracted from performance during the period as it is a longer-maturity bond and was affected by an increase in interest rates over the period.

BioMarin Pharmaceutical Inc. (1.25%, 15/05/2027) detracted from performance. BioMarin is a biotechnology company that develops treatments for rare genetic diseases. It has experienced delays in approvals and the bond price declined as a result, but the fund manager's favourable view of the bond has not changed.

This Fund was launched in July 2020. The majority of the holdings are within investment-grade and high-yield corporate credit, with some emerging markets credit as well. During the period, there were large trades in investment-grade and high-yield bonds, and some smaller allocations to convertible issues and securitized credit.

The Fund's allocation to convertible securities was increased during the period. Allocations to Boeing and AT&T were trimmed during the period, based on credit valuations.

Recent Developments

The fund manager's economic outlook became increasingly optimistic over the course of the first quarter of 2021. Vaccine rollouts have been proceeding at a favourable rate and the reopening looks like it is beginning to gather steam. Variants of the COVID-19 virus add some risk but the recent uptick in new cases appears to be in younger cohorts, with strong vaccination rates in the older, more vulnerable populations.

IA Clarington Loomis Global Multisector Bond Fund

March 31, 2021

Recent Developments (continued)

The introduction of vaccines, anticipation of an economic reopening and a large supportive fiscal package have produced solid ground for recovery and a potentially stronger expansion.

The fund manager remains comfortable with the exposures and diversification in the Fund and is focused on finding the best fundamental stories and areas of the market that could see further improvement from a reopening economy, including the transportation, recreational and hospitality industries. The focus in 2021 is on seeking to identify rising stars (i.e., issuers whose credit fundamentals could improve significantly, likely resulting in credit-quality rating upgrades).

Globally, the fund manager's focus has largely been in U.S.-dollar-pay issuers with strong fundamentals and favourable pricing.

Effective July 20, 2020, the Fund commenced offering Series A, E, F and I units. Subject to all applicable approvals, on or about August 27, 2021, the IA Clarington Global Bond Fund will merge into the IA Clarington Loomis Global Multisector Bond Fund.

Certain series of the Fund, as applicable, may make distributions which the Manager may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The Manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

Related Party Transactions

The Portfolio Manager is affiliated with the Manager as they are both under common control of Industrial Alliance Insurance and Financial Services Inc. ("Industrial Alliance").

For the provision of management services, the Manager received management fees from the Fund, based on the average Net Asset Values of the respective series. The management fees paid are disclosed in the financial statements.

The Manager paid the operating expenses of the Fund (the "Operating Expenses") in exchange for the payment by the Fund of a fixed rate administration fee (the "Administration Fee") to the Manager with respect to each series of the Fund, except for Series I and Series V, if applicable.

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the "Administration Fee") to the Manager with respect to each series of the Fund, except for Series I and Series V, if applicable. The expenses charged to the Fund in respect of the Administration Fee are disclosed in the Fund's financial statements. The Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. The Fund's most recent simplified prospectus contains further details about the Administration Fee.

In addition to the Administration Fee, each series of the Fund is responsible for its proportionate share of certain other operating expenses ("Fund Costs"). Further details about Fund Costs can be found in the Fund's most recent simplified prospectus. The Manager, at its sole discretion, may waive or absorb a portion of a series' expenses. These waivers or absorptions may be terminated at any time without notice.

During the period since its inception to March 31, 2021, the Fund did not pay brokerage commissions to iA Private Wealth Inc. (formerly, Industrial Alliance Securities Inc.), a subsidiary of Industrial Alliance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information in the following tables is based on prescribed regulations and as a result, is not expected to add down due to the increase (decrease) in net assets from operations being based on average units outstanding during the period and all other numbers being based on actual units outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

1 The per unit data is derived from the Fund's audited annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS"). Under IFRS, the Net Assets per unit presented in the financial statements is the same as the Net Asset Value calculated for fund pricing purposes.

2 Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

3 Distributions were paid in cash or reinvested in additional units of the Fund, or both.

4 Dividends qualified for Canadian dividend tax credit, when applicable.

- This information is provided as at each period shown.
- Management expense ratios are based on total expenses (excluding distributions, commissions, withholding taxes and other portfolio transaction costs) and a proportion of underlying fund expenses (mutual funds & ETFs), where applicable, of each series for the stated period and are expressed as an annualized percentage of each series' daily average NAV during the period.
- The annual Management Fees and Fixed Administration Fees net of waivers, if any, excluding HST, for the Fund were 1.34% for Series A, 1.24% for Series E, 0.82% for Series F and 0.00% for Series I.
- At its sole discretion, the Manager may have waived management fees or absorbed expenses of the Fund.
- The trading expense ratio represents total commissions incurred directly or indirectly by way of an underlying fund, as applicable, and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV during the period.
- The Fund's portfolio turnover rate indicates how actively the fund manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship or correlation between a high turnover rate and the performance of a Fund. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

Management fees paid by the Fund per series are based on applying the annual management fee rate per series to the daily average NAV of each series and are recorded on an accrual basis.

The following is a breakdown of major services received by the Fund in consideration of the management fees for the period, as a percentage of the management fee:

Management Fees (%)		
Series	Trailer commissions	Other
Series A		
FE	42	58
LL First 3 years	21	79
LL After 3 years	42	58
DSC First 7 years	21	79
DSC After 7 years	42	58
Series E		
FE	45	55
Series F	-	100
Series I	-	-

FE - front end; LL - low load; DSC - deferred sales charge; ASC - advisor service charge
Other - includes general administration, investment advice and profit.

Past Performance

The performance information shown (based on NAV) assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

The Fund began distributing securities on July 20, 2020 and in accordance with regulatory requirements, no annual compound returns will be shown for the Fund until twelve months after the date of inception.

Year-by-Year Returns

The bar charts show the Fund's performance for each of the periods indicated. The charts show, in percentage terms, how an investment made on the first day of each period would have increased or decreased by the last day of the period presented.

Forward-Looking Statements

This management report of fund performance may contain forward-looking statements which reflect the current expectations of the Manager (or, where indicated, the Portfolio Manager or Portfolio Sub-Advisor or fund manager) regarding the Fund's future growth, results of operations, performance and business prospects and opportunities. These statements reflect the current beliefs of the person to which the statements are attributed with respect to future events and are based on information currently available to that person. Forward looking statements involve significant risks, uncertainties and assumptions. Many factors could cause the Fund's actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. These factors could include, among other things, general economic, political and market factors, including interest and foreign exchange rates, business competition, changes in government regulations or in tax laws. Please refer to the prospectus for a discussion of some specific risks that are associated with mutual funds. Although the forward-looking statements contained in this report are based upon what management currently believes to be reasonable assumptions, the Manager cannot assure current or prospective investors that actual results, performance or achievements will be consistent with these forward-looking statements.
