March 31, 2024

Management Discussion of Fund Performance

The management discussion of fund performance for IA Clarington Global Risk-Managed Income Portfolio (the "Fund") represents management's view of the significant factors and developments affecting the Fund's performance and outlook for the 12-month period ended March 31, 2024. IA Clarington Investments Inc. is the manager (the "Manager") of the Fund.

Investment Objective and Strategies

The Fund's objective is to provide a consistent stream of income and capital appreciation by investing primarily, directly or indirectly through other mutual funds or exchange traded funds, in fixed income and equity securities from around the world. The Fund may also use derivatives to manage volatility. The Fund may invest up to 100% of its assets in foreign securities.

The Fund's Portfolio Manager is iA Global Asset Management Inc. ("iAGAM" or the "Portfolio Manager" or the "fund manager").

Risk

The overall risk of investing in the Fund remains as described in the prospectus.

The Fund is suitable for investors seeking the possibility for income and potential for capital appreciation, with a low risk tolerance and planning to invest over medium to long term.

Results of Operations

The Fund's Net Assets increased by 10.7% or \$0.9 million during the period, from \$8.4 million on March 31, 2023 to \$9.3 million on March 31, 2024. This change in Net Assets resulted from an increase of \$0.5 million due to net sales, a decrease of \$0.4 million due to distributions and an increase of \$0.8 million due to investment operations, including market volatility, income and expense.

The average Net Asset Value of the Fund increased by 25.7% or \$1.8 million in comparison to the prior period, from \$7 million to \$8.8 million. Average Net Asset Value influence revenue earned and expenses incurred by the Fund during the period.

Series A units of the Fund returned 9.1% for the 12-month period ending March 31, 2024. The performance of the other series of the Fund is substantially similar, save for differences in fees and expense structure. Refer to the "Past Performance" section for performance information of each series.

The Fund's broad-based benchmark, the FTSE Canada Universe Bond Index, returned 2.1% for the same 12-month period. The comparison to this broad-based index has been provided to help you understand the Fund's performance relative to the general performance of the Canadian bond market. The Fund's benchmark, which is composed of the 25% FTSE Canada Universe Bond Index, 20% FTSE Canada 91 Day T-Bill Index, 15% S&P 500 Index (CAD), 15% S&P/TSX Composite Index, 15% Bloomberg Global Aggregate Bond Index (CAD Hedged), 10% MSCI AC World Index^ (CAD), returned 10.6% for the same period. This comparison to Fund performance is more useful, because it more closely reflects the asset classes in which the Fund invests. The Fund's return calculation for all series includes fees and expenses, which are not applicable in generating a return for the benchmark.

In recent quarters, consensus expectations shifted away from a recessionary scenario, given the strong rise in interest rates in order to curb inflation. However, reaccelerating growth brought renewed inflationary pressures amid wage dynamics and the lingering pressures from post-pandemic excess demand. This

resulted in revised market expectations towards interest-rate reductions, which was lowered to three rate reductions expected for the year.

So far, Canada has avoided a recession owing to its booming demography, but economic momentum has been flat at best.

The rest of the world still faces the same challenges. The eurozone purchasing managers' indices (PMIs) still suggest that a recession is taking hold amid challenges such as high energy costs, waning consumer confidence and rising interest rates. PMI is an index of the prevailing direction of economic trends in the manufacturing and service sectors.

China's economic reopening also remains challenging, but recent figures for its manufacturing PMI, and new export orders in particular, suggest that the global economy may have found its footing and that demand for Chinese exports is about to pick up.

Within the Fund's equity sleeve, top contributors to performance included IA Clarington Global Value Fund and IA Clarington Loomis Global Equity Opportunities Fund.

Within the Fund's fixed-income sleeve, top contributors to performance included IA Clarington Floating Rate Income Fund, IA Clarington Strategic Corporate Bond Fund, iShares iBoxx \$ High Yield Corporate Bond Exchange Traded Fund (ETF) and iShares J.P. Morgan USD Emerging Markets Bond ETF.

The Fund's downside protection strategy detracted from performance, as the Fund's defensive position of holding an underweight position in equities and an overweight position in fixed income lagged during the period. Top detractors from performance included IA Clarington Dividend Growth Class, IA Clarington Strategic Equity Income Fund, IA Clarington Global Equity Fund and iShares 20+ Year Treasury Bond ETF.

Recent Developments

Looking further into 2024, the fund manager believes that the focus should remain on the emerging reacceleration of the U.S. economy, which is buoyed by consumers working through their excess savings and benefiting from this wealth effect.

Given how Canada is notorious for being sensitive to higher interest rates, it has become clear that tightened monetary policy has been effective at taming inflation overall, and the Bank of Canada is preparing to make interest-rate cuts. Monetary policy refers to the steps taken by a country's central bank to influence the direction of the economy. Canada's economy appears more sensitive to interest rate hikes than in the past due to Canadian households relative debt levels.

The fund manager expects to maintain the Fund's defensive position of holding underweight positions in equities and overweight positions in fixed income. Within equities, the fund manager expects to maintain a tilt toward value-oriented managers. Value investing refers to a strategy that seeks to identify and purchase securities that are trading below their true (intrinsic) value. The goal is to sell the securities for a profit when their market prices reflect intrinsic value.

Within fixed income, the fund manager expects to maintain a tilt toward corporate bonds as well as a slight tactical underweight position in U.S. long-term sovereign bonds.

Effective April 1, 2023, the Portfolio Manager changed from Industrial Alliance Investment Management Inc. to iA Global Asset Management Inc.

IA Clarington Global Risk-Managed Income Portfolio

March 31, 2024

Related Party Transactions

The Portfolio Manager is affiliated with the Manager as they are both under common control of Industrial Alliance Insurance and Financial Services Inc. ("Industrial Alliance").

For the provision of management services, the Manager received management fees from the Fund, based on the average Net Asset Values of the respective series. The management fees paid are disclosed in the financial statements.

The Manager paid the operating expenses of the Fund (the "Operating Expenses") in exchange for the payment by the Fund of a fixed rate administration fee (the "Administration Fee") to the Manager with respect to each series of the Fund, except for Series I and Series V, if applicable.

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the "Administration Fee") to the Manager with respect to each series of the Fund, except for Series I and Series V, if applicable. The expenses charged to the Fund in respect of the Administration Fee are disclosed in the Fund's financial statements. The Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. The Fund's most recent simplified prospectus contains further details about the Administration Fee.

In addition to the Administration Fee, each series of the Fund is responsible for its proportionate share of certain other operating expenses ("Fund Costs"). Further details about Fund Costs can be found in the Fund's most recent simplified prospectus. The Manager, at its sole discretion, may waive or absorb a portion of a series' expenses. These waivers or absorptions may be terminated at any time without notice.

During the 12-month period ended March 31, 2024, the Fund did not pay brokerage commissions to iA Private Wealth Inc.

In order to avoid duplication of management fees, if a Fund invests directly in a Reference Fund managed by IA Clarington or an affiliate it may purchase Series I Securities (or the equivalent) of the Reference Fund and will not be charged a management fee or a fixed expense charge in respect of those securities. Alternatively, if Series I Securities (or the equivalent) are not purchased in these circumstances, we make sure that there is no duplication of management fees. In addition, if a Fund invests in another mutual fund, it will not pay duplicate sales charges or redemption fees with respect to the purchase or redemption by it of securities in the Reference Fund.

Certain of the Funds have established or may establish standard broker-dealer agreements with iA Private Wealth Inc., a subsidiary of Industrial Alliance and related company. Pursuant to applicable securities legislation, the Funds may rely on the standing instructions from the IRC with respect to one or more of the following transactions:

- (a) trades in securities of iA Financial Corporation Inc.;
- (b) investments in securities of issuers during, or for 60 days after, the period in which a related party dealer acts as an underwriter in the distribution of such securities;
- (c) purchases or sales of securities of an issuer from or to another investment fund managed by IA Clarington.

The applicable standing instructions require that the above activities be conducted in accordance with IA Clarington policy and that IA Clarington advise the IRC of a material breach of any standing instruction. IA Clarington policy requires that an

investment decision represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Funds.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information in the following tables is based on prescribed regulations and as a result, is not expected to add down due to the increase (decrease) in net assets from operations being based on average units outstanding during the period and all other numbers being based on actual units outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

1 The per unit data is derived from the Fund's audited annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS Accounting Standards"). Under IFRS, the Net Assets per unit presented in the financial statements is the same as the Net Asset Value calculated for fund pricing purposes.

2 Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

3 Distributions were paid in cash/reinvested in additional units of the Fund, or both.

4 Dividends qualified for Canadian dividend tax credit, when applicable.

1 This information is provided as at each period shown.

2 Management expense ratios are based on total expenses (excluding distributions, commissions, withholding taxes and other portfolio transaction costs) and a proportion of underlying fund expenses (mutual funds & ETFs), where applicable, of each series for the stated period and are expressed as an annualized percentage of each series' daily average NAV during the period.

3 The annual Management Fees and Fixed Administration Fees, excluding HST, for the Fund were 1.90% for Series A, 1.80% for Series E, 0.80% for Series F and 0.00% for Series I.

4 At its sole discretion, the Manager may have waived management fees or absorbed expenses of the Fund.

5 The trading expense ratio represents total commissions incurred directly or indirectly by way of an underlying fund, as applicable, and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV during the period.

6 The Fund's portfolio turnover rate indicates how actively the fund manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship or correlation between a high turnover rate and the performance of a Fund. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

Management fees paid by the Fund per series are based on applying the annual management fee rate per series to the daily average NAV of each series and are recorded on an accrual basis.

IA Clarington Global Risk-Managed Income Portfolio

March 31, 2024

The following is a breakdown of major services received by the Fund in consideration of the management fees for the period, as a percentage of the management fee:

Management Fees (%)			
Series	Management Fees	Breakdown of Services	
		Trailer commissions	Other
Series A FE	1.75	57	43
Series E FE	1.65	61	39
Series F	0.70	-	100
Series I	-	-	-

FE - front end; LL - low load; DSC - deferred sales charge; ASC - advisor service charge
Other - includes general administration, investment advice and profit.

Past Performance

The performance information shown (based on NAV) assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for each of the periods indicated. The charts show, in percentage terms, how an investment made on the first day of each period would have increased or decreased by the last day of the period presented.

** Return shown is for the partial period ended March 31.

Annual Compound Returns

The tables show the annual compound returns for the Fund compared to the FTSE Canada Universe Bond Index (the "Broad-based Index") and the benchmark index (the "Benchmark Index") which consists of the FTSE Canada Universe Bond Index (25%), the FTSE Canada 91 Day T-Bill Index (20%), the Bloomberg Global Aggregate Bond Index (CAD Hedged) (15%), the S&P/TSX

IA Clarington Global Risk-Managed Income Portfolio

March 31, 2024

Composite Index (15%), the S&P 500 Index (CAD) (15%) and the MSCI AC World Index^A (CAD) (10%) for the periods ended March 31, 2024.

Annual Compound Returns, Series A		
Percentage (%)	Since Jan.20/22	Past 1 Year
Series A	2.0	9.1

Series I	4.2	11.5
Broad-based Index	(1.7)	2.1
Benchmark Index	3.8	10.6

The FTSE Canada Short Term Corporate Bond Index is based on the Corporate sector of the FTSE Canada Universe Bond Index. The Corporate sector is further divided into sub-sectors based on major industry groups: Financial, Communication, Industrial, Energy, Infrastructure, Real estate, and Securitization.

The FTSE Canada 91 Day T-Bill Index is designed to track the performance of Government of Canada 3-month Treasury Bills. The index is designed to reflect the performance of a portfolio that only owns a single security, the current on the run T-Bill for the relevant term, switching into the new T-Bill at each auction.

The Bloomberg Global Aggregate Bond Index (CAD Hedged) is a flagship measure of global investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers.

The S&P/TSX Composite Index is the premier indicator of market activity for Canadian equity markets, with 95% coverage of Canadian-based, TSX-listed companies. The index includes common stock and income trust units and is designed to offer the representation of a broad benchmark index while maintaining the liquidity characteristics of narrower indices.

The S&P 500 Index (CAD) includes 500 leading companies in leading industries of the U.S. economy and is widely regarded as the best single gauge of the U.S. equities market. Although the S&P 500 Index focuses on the large cap segment of the market, its coverage includes approximately 80% of the market.

The MSCI AC World Index^A (CAD) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI Index^A (CAD) consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes. The developed market country indexes included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Türkiye and United Arab Emirates.

A discussion of the performance of the Fund as compared to the Benchmark Index is found in the "Results of Operations" section of this report.

Forward-Looking Statements

This management report of fund performance may contain forward-looking statements which reflect the current expectations of the Manager (or, where indicated, the Portfolio Manager or Portfolio Sub-Advisor or fund manager) regarding the Fund's future growth, results of operations, performance and business prospects and opportunities. These statements reflect the current beliefs of the person to which the statements are attributed with respect to future events and are based on information currently available to that person. Forward looking statements involve significant risks, uncertainties and assumptions. Many factors could cause the Fund's actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. These factors could include, among other things, general economic, political and market factors, including interest and foreign exchange rates, business competition, changes in government regulations or in tax laws. Please refer to the prospectus for a discussion of some specific risks that are associated with mutual funds. Although the forward-looking statements contained in this report are based upon what management currently believes to be reasonable assumptions, the Manager cannot assure current or prospective investors that actual results, performance or achievements will be consistent with these forward-looking statements.
